Actual lecture video: end-to-end functional test

Source: MIT OpenCourseWare; Prof. Gilbert Strang

18.06 Linear Algebra; linked Archive source: Spring 2005

OCW page: course 18-06-linear-algebra-spring-2010, lecture 1

Video: https://archive.org/download/MIT18.06S05_MP4/01.mp4

Requested source interval: 600-612 seconds; clip timestamps start at zero.

359 frames, 480x360, 11.9786 seconds; no audio.

OCW license: CC BY-NC-SA 4.0. Archive metadata: CC BY-NC-SA 3.0 US.

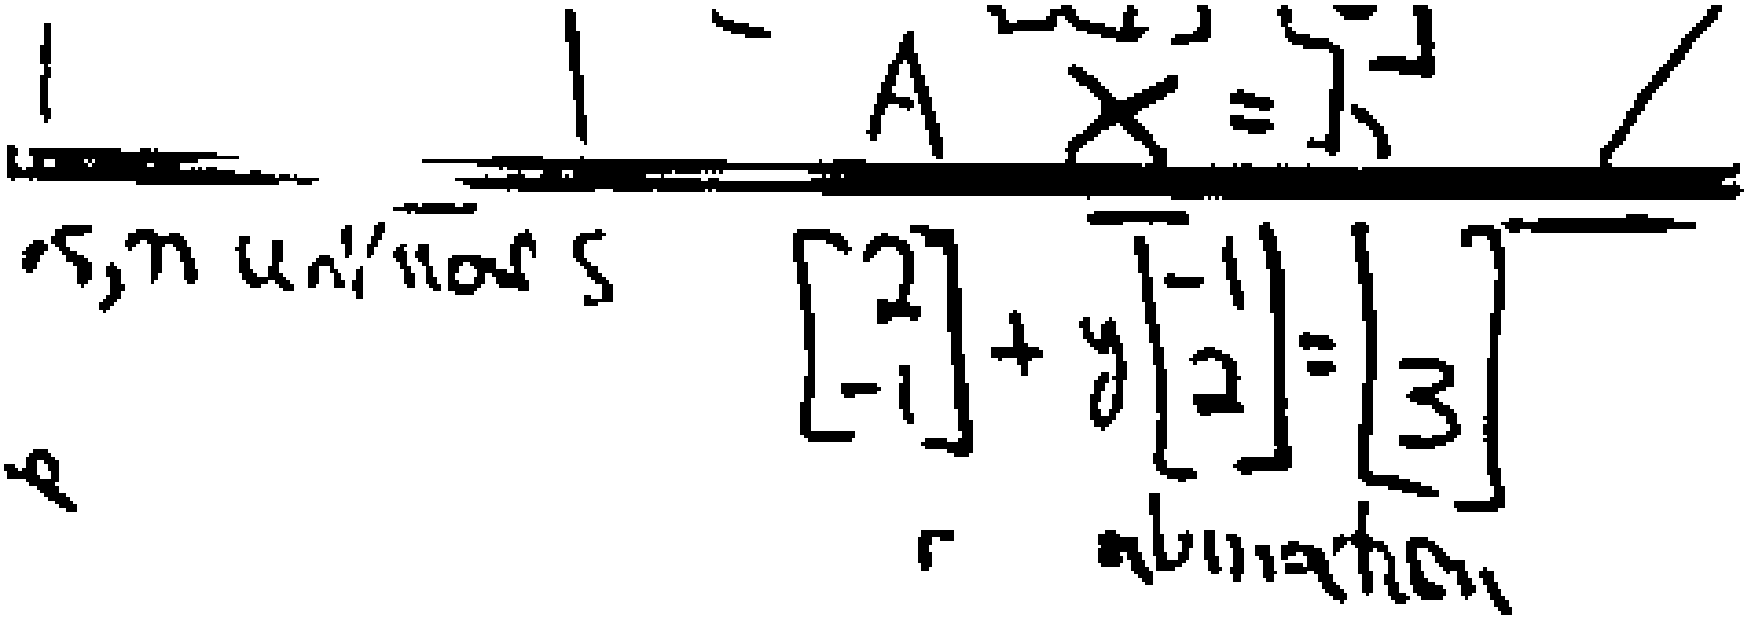

Version discrepancy retained; see video-provenance.json.

Pipeline: FCN-LectureNet V34 / ST3D / PP-DocLayout-S / PP-OCRv5 Mobile / PP-FormulaNet-S

Recognition requires human review. No accuracy score without ground truth.

Original board image (complete frame; no overlays or crop)

Source dimensions: 480 x 360 | Timestamp (seconds): 6.006 | Recognition input: b0

Recognition data and rendered mathematics

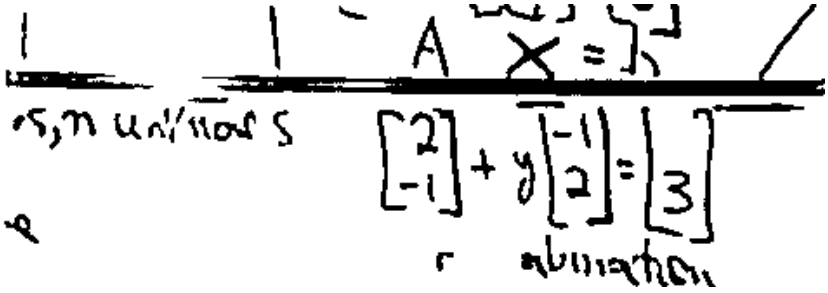

Unicode text and literal LaTeX are searchable and copyable. Rendered mathematics verifies supported syntax only; it does not establish recognition or mathematical correctness.

Region region_0000

Type: unknown | Recognition status: needs_review | BBox [x1,y1,x2,y2]: [1, 0, 477, 163]

Model: None | Confidence: None

Preserved source crop (not replaced by a guessed expression):

Region region_0001

Type: unknown | Recognition status: needs_review | BBox [x1,y1,x2,y2]: [234, 9, 279, 40]

Model: None | Confidence: None

Preserved source crop (not replaced by a guessed expression):

Region region_0002

Type: formula | Recognition status: ok | BBox [x1,y1,x2,y2]: [278, 10, 388, 43]

Model: PP-FormulaNet-S | Confidence: None

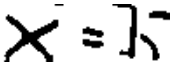

LaTeX source: x=j

Formula prediction requires human review, including when it renders successfully.

Rendering status: rendered | Engine: pdflatex+pdftoppm

$$x = j$$

Preserved source crop (not replaced by a guessed expression):

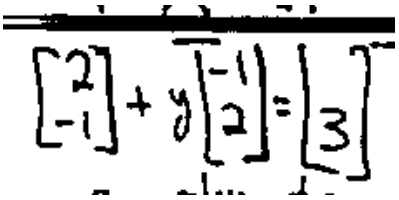

Region region_0003

Type: unknown | Recognition status: needs_review | BBox [x1,y1,x2,y2]: [202, 37, 427, 146]

Model: None | Confidence: None

Preserved source crop (not replaced by a guessed expression):

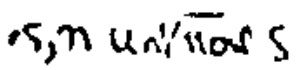

Region region_0004

Type: unknown | Recognition status: needs_review | BBox [x1,y1,x2,y2]: [6, 52, 175, 88]

Model: None | Confidence: None

Preserved source crop (not replaced by a guessed expression):

Region region_0005

Type: unknown | Recognition status: needs_review | BBox [x1,y1,x2,y2]: [0, 112, 29, 145]

Model: None | Confidence: None

Preserved source crop (not replaced by a guessed expression):

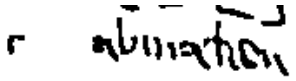

Region region_0006

Type: unknown | Recognition status: needs_review | BBox [x1,y1,x2,y2]: [243, 126, 418, 170]

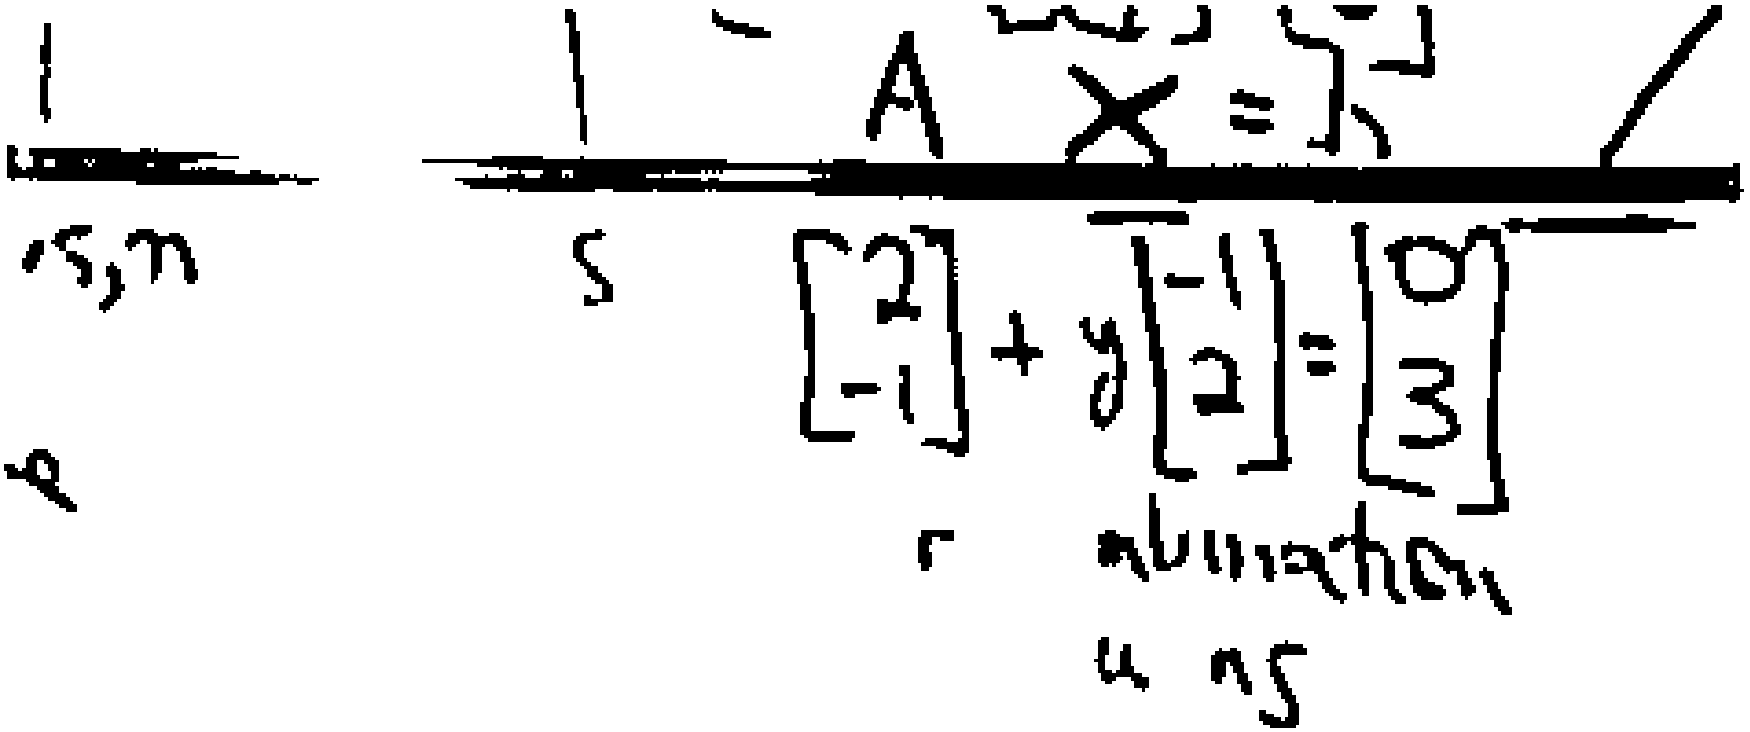

Model: None | Confidence: None

Preserved source crop (not replaced by a guessed expression):

Original board image (complete frame; no overlays or crop)
